Questions: Please print each correct answer in the answer section of page 1. (See directions.)

1. Some vehicle manufacturers allow installation of CRs using lower attachments in the center rear with wider spaced, non-standard bars from outboard positions. Which vehicle manufacturer has reversed its earlier policy and now allows center-rear LATCH installation **only** if that position is specifically designated as a standard LATCH position?

A	Land Rover
B	Jeep/Eagle
C	General Motors (Buick, Cadillac, Chevrolet and other brands)
D	Suzuki

2. Which vehicle manufacturer now allows installation of CRs using lower attachments in the center-rear, non-LATCH positions in **all** models (starting with the 2009 MY), providing that the CR manufacturer allows such use?

A	Volvo
B	Daewoo
C	Ford brands (Ford/Lincoln/Mercury)
D	VW/Audi

3. Where can you find the **text** of Chrysler/Dodge/Jeep tether anchor retrofit Service Bulletin?

A	Chapter 6, p. 68
B	Appendix B, quick reference list
C	Appendix B, Ford vehicle listing, bullets
D	Appendix C

4. In which school buses would you expect to find school bus seats with lower anchors?

A	School buses manufactured after Sept. 2007
B	Only school buses under 20,000 lb gross vehicle weight
C	School buses manufactured starting in Sept. 2002
D	Only school buses under 10,000 lb gross vehicle weight
E	Both A and D
F	Both C and D

5. Where can you find the main LATCH trends from the product survey used for this manual?

A	Page 4
B	Page 14
C	Appendix A
D	Appendix B

6. Columbia, Merritt, Safe Traffic System, and Snug Seat now advocate what new method or methods to use standard tether anchors for children over specified weights?

A	Two separate tether straps attached to separate tether anchors
B	Two tether hooks attached to one anchor
C	One tether strap with two tether hooks attached to adjacent anchors
D	Both A and C
E	Both A and B

7. What page offers the simplest way to compare weight and tether anchor requirements for CR models for children above 40 pounds?

A	Page 27
B	Page 60
C	Page 70
D	Page 110

8. What is best practice if a family's vehicle has LATCH but the parents prefer to use a position that does not have lower anchors but is suitable for their child?

A	Explain that a LATCH position is always best.
B	Help them use their preferred position if the seat belt provides a tight installation.
C	Be sure to fasten the tether strap under the seat ahead.
D	None of the above.

9. On what page(s) would you find the most detailed information to help you talk with a parent regarding use of a tether on a CR for a child weighing 55 pounds in a vehicle that has a tether-anchor maximum of 40 pounds?

A	Pages 33-36
B	Page 43
C	Pages 60-64
D	Page 110

10. In a Nissan Quest, 1999 MY, with a third-row bench seat that has been moved up to the second row, the tether anchor for the passenger side position is:

A	The latchplate of the third-row lap-shoulder belt that is directly behind the location of the CR.
B	A cargo tie-down in the floor next to the right wheel well.
C	In the frame of the tailgate just above the door.
D	Built into the back of the vehicle seat.
