

Criteria for Nomination

The following criteria should be considered when nominating an individual for the MACPS Hall of Fame.

Criteria 1

Made significant and enduring contributions to the field of CPS

These contributions must be exemplary. What difference did the nominee make that would make future generations think his or her achievement was outstanding? Are these contributions normal for an individual in their field or well beyond normal? Were these achievements extraordinary within the context of the time in which it occurred? Will these accomplishments stand the test of time? Will this nominee represent a significant and enduring accomplishment 50 years from now? If yes, nominate them. Verify facts concerning the candidate. Do not make assumptions. (40%)

Criteria 2

Elevated the status of CPS and helped open new frontiers for other individuals

Highlight how individuals were positively impacted by this nominee's accomplishments. How did the nominee enhance society's view of CPS? What changed as a result of this nominee's actions? What did he/she accomplish that changed the future for CPS? (40%)

Criteria 3

Inspired others in CPS by their example

Highlight this nominee's impact on others. Describe the characteristics that make them a role model for others. Explore the depth of that impact by talking with others (peers, colleagues, historical groups). Find out what positive and lasting changes occurred based on the nominee's achievements locally, statewide, nationally, or internationally which serve as the basis for the inspiration. (20%)
